

OEMS CAN'T VOID YOUR WARRANTY IF YOU USE COMPATIBLE SFPS

CONSIDERING THAT LEGALLY, THEY CAN'T

The Magnuson-Moss Warranty Act prevents manufacturers from using misleading warranty disclaimers. Unless they provide the product for zero cost, they cannot prohibit a compatible option being used.

THEY HAVE PUBLICLY STATED THIS ON THEIR WEBSITES

While the OEMs cannot limit the purchasing or use of compatible options, they do not have to provide support—luckily CCX offers a 100% guarantee of compatibility and a lifetime warranty.

DON'T PAY MORE FOR AN OEM STICKER

System manufacturers don't build the optics or cables that connect their systems. Providing your customer with compatible options gives them superior quality products, more options and a higher margin for you and your partner.
